PERSONAL DESCRIPTION

Student from the Information Technologies Degree, I'm interested in developing my abilities mainly in the following topics: information security, video games developing and web design.

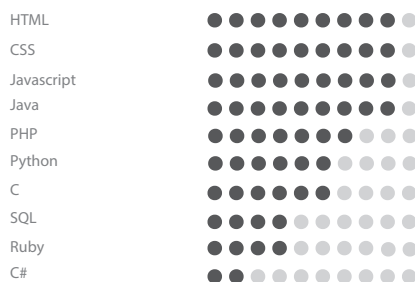

In my University I've developed different projects, like web applications, web sites, serves configuration and others, for different real clients in academic exchange only.

Also I've more than two years experience in sales with different organizations, with companies and international associations. I've participated too with web development companies, non-government organizations, international startups and making freelance work.
