PERSONAL DESCRIPTION

Student from the Information Technologies Degree, I'm interested in developing my abilities mainly in the following topics: information security, project management and web design. In my University I've developed different projects, like web applications, platforms, web sites, servers configuration and others, for different real clients in academic exchange only.

Also I have more than two years experience in different organizations: web development companies, non-government organzations, international startups and international associations. I've participated within this companies in web development, database management, design, IT support, team management, project management, strategic planning and team management.
